

IRIS Money

Digital Wallet and Branchless Banking Solution

Digital Wallet and Branchless Banking Solution for Banks, Telecoms and TPSPs

- n Broad range of customer, wallet and agent management options
- n Increased reach with low customer acquisition and maintenance costs
- n Enhanced end-user experience for customers
- n Value-added services including P2P, G2P and P2B payments
- n Loyalty, fraud management, and business intelligence components

Why customers choose IRIS Money?

- n New services, new revenue streams
IRIS Money enables you to attract new customers and extend your market reach while offering convenient, secure and affordable services to your customers.
- n Comprehensive feature set
The solution opens doors for new, innovative products and delivery methods that not only blend but also extend the traditional financial products.
- n Integration with existing infrastructure
IRIS Money seamlessly integrates with existing infrastructure through Open APIs allowing you to significantly reduce time-to-market and achieve greater overall efficiency.

Branchless banking is seeing tremendous growth in many emerging market economies. As mobile penetration is increasing, financial institutions are exploring new ways to serve mass consumer segments and unlock new revenue streams. In this context, IRIS Money helps you increase your service offerings and acquire customers who are otherwise beyond your reach.

IRIS Money offers a range of services through different digital payment instruments and provides a true Omni-channel experience. Whether you are a bank, telecom or third party service provider, IRIS Money enables you to deliver branchless banking services while keeping costs to a minimum. As a result, you benefit by introducing value-added products, and increase overall profitability by opening new sources of revenue.

The feature-rich solution enables financial institutions and TPSPs to offer unified transactional banking services through a proven, robust, and reliable IRIS platform.
